

Mike Lay

mike@mkly.io - mkly.io - github.com/mkly - San Francisco, CA

Looking to return to customer-facing work after several years in software development. Not only do I find it more rewarding, but I also see it as the future of how software will be built.

Customer Experience

CircleCI - Support Engineer, 2020 - 2021

- Supported developers from small teams to enterprises like Facebook Research and Palantir
- Shipped fixes for priority customer issues, led team technical training, and built internal tools to improve support responsiveness

Engineering Experience

Contract Software Engineer & Open-Source Contributor, 2024 - Present

- **Rox** - integrated acquired-product features on schedule; client asked for an extension
- **MLCommons** - built the frontend for the AI Risk & Reliability model eval v0.5 release
- **Stanford CRFM** - rebuilt the HELM frontend in React (2025 Stanford Open Source Software Prize)

Quilt Research - Software Engineer, 2023 - 2024

- Built the Slack integration and RFP spreadsheet ingestion for LLM-powered sales tools

Savage X Fenty - Software Engineer (Labs Team), 2021 - 2022

- Built an A/B testing framework; coached junior engineers and reviewed most frontend PRs

YT Advisors - Software Engineer, 2018 - 2019

- Integrated Stripe subscriptions, Google Classroom, and Vimeo into an ed-tech platform

TriTech Connect - Software Engineer, 2017 - 2018

- Took a B2B HVAC subscription product to market: field app, per-client pricing, 3PL sync

Earlier:

- Pushup Social (2015 - 2016) Software Engineer
- PortlandLabs (2012 - 2013) Software Engineer and Concrete CMS repo maintainer

Projects

- **The Last SaaS** - **thelastsaas.com** (github.com/mkly/thelastsaas) - open-source data platform run by AI assistants over MCP and a CLI
- **Ruffle** - **helloruffle.com** - sponsorship fundraising for animal rescues
- **PR Poet** (github.com/mkly/pr-poet - model (huggingface.co/mkly/pr-poet-lora))
- GitHub Action that writes pull request poems with a fine-tuned Qwen3-0.6B (GRPO + LoRA)
- **jev-bisect** (github.com/mkly/jev-bisect) - python library that uses Jev to find a numeric answer by bisection
- **agent-desktop** (github.com/mkly/agent-desktop) - headless Linux desktops for AI agents that need GUI apps
- **join@thenetwork.fyi** - **thenetwork.fyi** - networking product built around an LLM-powered email agent
